

```
package bank.management.system;

import java.sql.*; //for sql
public class Conn {
    Connection c; //to make connection to dataBase
    Statement s;
    public Conn()
    {
        //for exception handling
        try
        {
            //Class.forName(com.mysql.cj.jdbc.Driver);

c=DriverManager.getConnection("jdbc:mysql:///bankmanagementsystem","root","
Shivakumar2605");
            s=c.createStatement();
        }
        catch (Exception e)
        {
            System.out.println(e);
        }
    }
}
```
